---

EDUCATION

Brigham Young University – BS in Mechanical Engineering (April 2012), Minor in Business, GPA: 3.65
Awards: University Scholarship, Foresters Scholarship, McDonalds Scholarship

RELEVENT EXPERIENCE

Acquia – Developer   **Aug 2012 – Present**
- Daily frontend feature development on high-profile websites with 100,000+ daily visitors.
- Led a team of 8 developers to architect and build an interactive online livestream watching experience and live publishing workflow. It was successfully debuted for a major event that was streamed to ~600,000 viewers (with over 50% on mobile devices). The viewing experience was praised in publications like The Washington Post, Bloomberg, and Vox.
- Integrated a PHP automated testing toolset and workflow into several enterprise websites.
- Led a hackathon team in building an application to visualize data from government APIs during the National Day of Civic Hacking.

Bitbooks.cc – Architect/Web Engineer (Side project)   **October 2013 – June 2014**
- Architected and built a service (bitbooks.cc) for generating static websites from markdown files.
- Worked across the web stack, from the frontend styleguides, to the Ruby Github API interface, to the database architecture, to the Docker server instances.
- Successfully evaluated, learned, and integrated a suite of unfamiliar technologies.
- Created my own designs and built site-templates to be stylish and readable.
- Released various open source components to benefit the PHP, Javascript, & Ruby communities.

Freelance Web Developer   **Aug 2009 – Present**
- Built a range of web products including: portfolios, forums, books, blogs, and small business sites.
- Designed graphics, icons, and page layouts to keep sites simple, attractive, and mobile-friendly.

Start-up Weekend, Salt Lake City – Frontend Developer   **February 2012**
- Converted site mockups and Adobe Illustrator designs into valid HTML and CSS code.
- Interviewed end users to get market validation and integrated feedback into product design.
